# WEATHER OF CONCERN

## Weather of Concern

- Another round of thunderstorms is expected this afternoon across interior mountains, especially near the Trinity Alps, Yolla Bollys, and Marble mountains. Isolated storms can be expected in other areas, including potentially a few along the Redwood Coast during the evening. The primary threat from these storms will be frequent lightning and small hail, in addition to brief heavy downpours and gusty winds.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

\*\*\* Scattered Thunderstorms with Moderate Rainfall near the Higher Terrain Daily through Thursday \*\*\*

\*\*\* Drier with more Wind from the Cascade-Sierra Crest East Beginning Friday, Increasing the Chance of Holdover Fires \*\*\*

Low pressure near the northern CA coast will continue to pull moist unstable monsoon moisture northward into the region. Temperatures will be near normal with fairly high humidity. Showers and thunderstorms will mainly occur near the higher terrain, from Lake County north in western areas, from northern Shasta County north in the central areas, and all areas in the east, especially from the Cascade-Sierra crest east. On Thursday showers and thunderstorms will mainly be confined to far northern and far eastern areas. A direct hit from a thunderstorm could yield 0.50 inches of rainfall, but dry strikes and new ignitions are always possible. Outflow winds from any storms could reach 30-40 mph and would affect fire behavior and suppression activities on any nearby fires. This pattern will continue the active Initial Attack situation and elevated potential for significant fires, but due to the higher RH and potential rainfall this event remains below High Risk criteria.

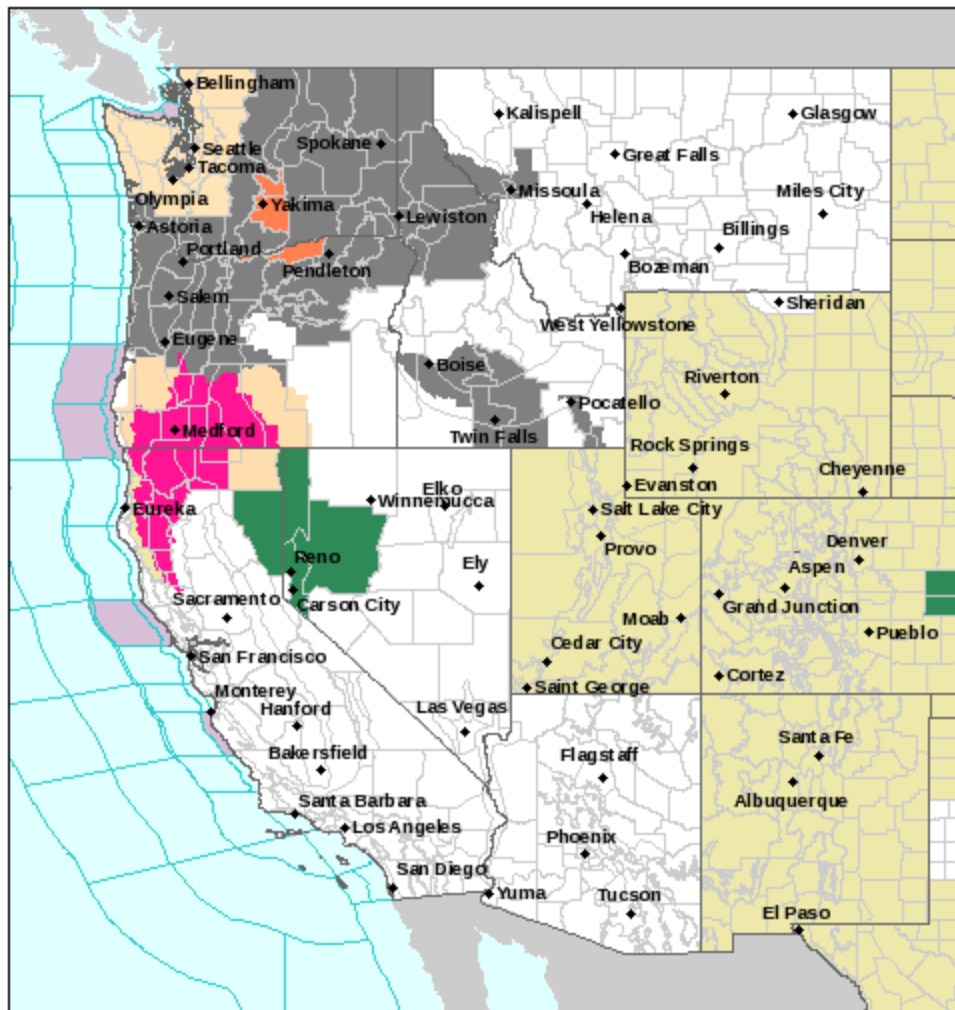

On Friday and Saturday the low will move off to the NE and thunderstorm chances will be minimal and only near the OR state line. Afternoon S-W winds will begin to increase from the Cascade-Sierra crest east as humidity gradually drops, increasing the chances for holdover fires becoming more active and spreading.

## **SOUTHERN CALIFORNIA**

Weak low pressure off the Northern California Coast and high pressure centered over Mexico will remain nearly stationary causing little change in the weather through this weekend. Isolated showers and thunderstorms will be possible over the Sierra Crest and Northern Deserts each afternoon. Temperatures will be near normal, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be between 15% and 30% above and inland from the marine layer. The marine layer will be between 1,500 and 2,000 feet deep through this weekend. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the desert passes each afternoon.
